SUMMARY

Experienced Full Stack Developer with over 2+ years of expertise in building and deploying scalable web applications using React.js, Redux, Node.js, and MongoDB. Adept at collaborating with stakeholders to deliver user-centric solutions, optimizing application performance, and ensuring seamless functionality. Proficient in Agile methodologies, Git workflows, and debugging live production issues for smooth operations.

SKILLS

- Front-End Development: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
- Back-End Development: Node.js, Express.js, RESTful API Development
- Database Management: MongoDB, Data Modeling, CRUD Operations
- Version Control: Git, GitHub, Git Workflows, Code Reviews
- Development Practices: Agile, Responsive Design, Debugging, Performance Optimization, API Integration

EXPERIENCE

Software Developer - Augean Enterprise Solution Pvt. Ltd   September 2022 - Present

Full-Time   Mumbai, Maharashtra

- Developed and optimized key features like transactions, reports, and dashboards for a textile industry web application using React.js and Redux.
- Collaborated with the back-end team to integrate APIs, ensuring system reliability and seamless functionality.
- Designed an Excel download feature to handle large datasets efficiently by generating files on the back end, caching them, and delivering in binary format to prevent browser freezing.
- Participated in weekly deployments, resolving critical live and production issues to ensure smooth operations.
- Leveraged GitHub for version control, code reviews, and collaboration, contributing to an Agile development process for timely feature delivery.

PROJECTS

Task-Me (https://task-manager-app-client-olive.vercel.app)

A full-stack application for streamlined task management, enabling admins to assign and track tasks while employees manage workflows efficiently.

Key features include:

- Built Task Manager, a full-stack app using React, Redux, Express.js, MongoDB, and Tailwind CSS for efficient task management.
- Enabled admins to add employees, assign and manage tasks, and track progress in real time.
- Designed employee features to receive notifications, view task details, and update timelines.
- Streamlined workflows with real-time tracking and intuitive task management tools.

Klimate (https://klimateweather.vercel.app/)

A responsive weather application offering real-time weather updates, forecasts, and insights.

Key features include:

- Built a responsive weather app using React, TypeScript, Tailwind CSS, and ShadCN UI, offering a modern user experience.
- Integrated OpenWeather API with React Query for real-time weather data, including hourly temperature graphs and 5-day forecasts.
- Implemented global city search functionality, allowing users to retrieve detailed weather data for any location.
- Improved UI/UX with interactive visuals and seamless navigation, making it accessible and engaging for users.

EDUCATION

B-Tech (Mechanical Engineer)   Nagpur, Maharashtra

Nagarjuna Collage of Engineering and Management   July 2018 - July 2021
